

CO-PACKING →

PRODUCTION

DaklaPack produces laminated packaging in its factories in the Netherlands and China. The production process involves the following steps:

- ◇ Extruding polyethylene
- ◇ Printing foil (both flexo and rotogravure)
- ◇ Laminating foil
- ◇ Production of high-quality laminated pouches
- ◇ Sealing components in flexible packages (such as spouts)
- ◇ In-rail placement of pouches

FILLING

We specialise in developing packaging, but we have just as much expertise in filling our packaging. Do you have a fantastic product but you want advice on repackaging and filling it? Feel free to contact us! You only have to do supply the product to be packaged in bulk quantities, and we return a complete end product to you. It couldn't be easier!

MACHINES

In addition to a unique and broad range of packaging for liquids and solids, DaklaPack also offers a wide range of automated and semiautomated solutions for filling and sealing your spouted pouches, stand-up pouches and sachets. Our packaging and solutions are used in the food industry, pharmaceutical, non-food and animal feed sectors. We are happy to advise and support you in finding a complete solution, from filling to sealing.

LAMINATED PACKAGING

LAMINATED PACKAGING

The laminated packages of DaklaPack are high-quality packages which meet your special requirements. The packages are used for food, drink and pharmaceutical products. Laminated packages are often used in laboratories, including for packaging product samples and other materials and preparations.

The laminated packages are particularly suited for products which make high demands of storage and use. They are therefore made from high-quality materials with excellent barrier properties which optimally protect the content.

TAILOR MADE

Are you looking for printed laminated packaging, laminated packaging in various formats or laminated packaging designed according to your wishes? This is possible!
